

Mount Diablo Mexican.

282

Land. Rough & Stony
 3^d rate for Cultivation.
 August 24th 1865.

Note

The reason for deviating from general instructions in beginning the Subdivision at the Cor. to Sec. 4, 31832, is: that the Eastern half is high rocky and barren mountains. Wholly unfit for ^{cultivation or} settlement. The Western part is nearly level 1st, 2^d & 3^d rate for Cultivation. And some Settlers already upon the Land.
