

TOWNSHIP 40 NORTH, RANGE 66 EAST, MDM, NEVADA

CHAINS	GENERAL DESCRIPTION
	The land within Township 40 North, Range 66 East, ranges from about 5,600 to 6,000 ft. above sea level and is nearly level to rolling. The soil is sandy clay, gravelly and rocky. The vegetation consists of sagebrush and crested wheat grass. There are scattered stands of juniper and pinon pine along the ridge tops. The township is drained by Toano Draw, which drains northerly through the western portion of the township. There is an oil well site in section 8. No mineral formations of consequence were noted during the survey. Principal users of the area are cattlemen. Access into the township is provided by desert trail roads throughout the township.
